

CHAP OR CHINK MEASUREMENTS SHEET

Please download this form or fill it out online, and send it to us by email so that we can do our best to provide you with a pair of chaps or chinks you will have for a long time.

When measuring, have someone else help you with the measurements by using a soft measuring tape, or string as a substitute and measure after. Make sure you wear the clothing you would normally wear under your chaps, including boots (for shotgun, show or batwing/working/rodeo chaps).

Pull the tape around until it is just snug, but not tight, and ensure it is level and no twists in the tape. Measuring in inches or centimeters is fine (just specify).

BE AS ACCURATE AS YOU CAN WITH THE MEASURING

Date

WAIST OR HIP

A - Measure around where you want the chap belt to be. This is usually under your regular belt.

LENGTH

B - Measure from the side starting from where you took the waist or hip measurement and go to the floor. *(*For Chinks, measure from A to E which is mid calf and a bit longer if you prefer.)*

THIGH

C - Measure around the thigh at the largest point, which is usually under the crotch.

KNEE

D - Measure around the largest point of the knee joint, with the knee slightly bent.

CALF

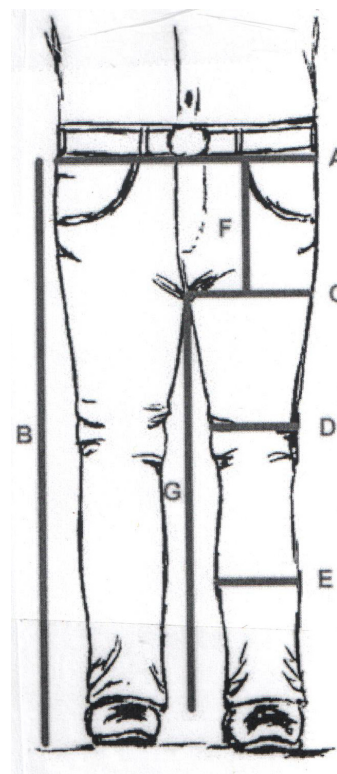

E - Measure around the largest point. *(This measurement is only for shotgun or show chaps.)*

DROP

F - Measure the distance from where the waist/hip measurement was taken to the crotch.

INSEAM

G - Measure from the crotch to the top of the toe of your boot. If you want it longer, please specify how much longer to allow for bended knee on a horse.

If you have any special requests for initials or brands, please draw them out on a separate sheet as clearly as you can. For logos, please provide a digital image. If you have further questions, please call us at (780) 662-4980. Please, email the completed form to: info@jamesbuiltsaddlery.ca
